Art Unit: 1635

DETAILED ACTION

Claims 1-26 are pending in the instant application.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, 10, 12-20 and 26, drawn to compositions and methods for reducing goblet cell hyperplasia in an organism's airway comprising the administration of a kinase inhibitor, classified in class 514, subclass 1.
- II. Claims 1, 4-6, 12-17, 21-23 and 26, drawn to compositions and methods for reducing goblet cell hyperplasia in an organism's airway comprising the administration of antibodies, classified in class 424, subclasses 130.1, 141.1 and 143.1.
- III. Claims 1, 7-9, 11-17 and 24-26, drawn to compositions and methods for reducing goblet cell hyperplasia in an organism's airway comprising the administration of an antagonist which inhibits release of a transmembrane EGF-R ligand, classified in class 424, subclass 9.2.

Applicants should note that several claims which appear in multiple groups, particularly claims 1, 12-17 and 26, will be examined according to the limitations of the elected group since said claims were found to be generic to patentably distinct groups.

Art Unit: 1635

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I and II and III are unrelated because they comprise compositions which are chemically, biologically, structurally and functionally distinct from each other and thus one does not render the other obvious. The kinase inhibitors of Group I are not required to make the antibodies or Group II or the antagonists of Group III, the antibodies of Group II are not required to make the kinase inhibitors of Group I or the antagonists of Group III, and the antagonists of Group III are not required to make the kinase inhibitors of Group I or the antibodies of Group II. The modes of action and functions of each Group are different and distinct: Group I comprises kinase inhibitors, Group II comprises antibodies which bind to either EGF or EGF-R, and Group III comprises antagonists which inhibit release of a transmembrane EGF-R ligand. In addition, the methods of Groups I and II and III comprise steps which are not required for or present in the methods of the other groups: administration of a kinase inhibitor (Group I); administration of an antibody (Group II); and administration of an inhibitor of release of a transmembrane EGF-R ligand (Group III). Therefore, the inventions of these three groups are capable of supporting separate patents.

Application/Control Number: 09/616,223

Art Unit: 1635

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Conclusion

Certain papers related to this application may be submitted to Art Unit 1635 by facsimile transmission. The faxing of such papers must conform with the notices published in the Official Gazette, 1156 OG 61 (November 16, 1993) and 1157 OG 94 (December 28, 1993) (see 37 C.F.R. § 1.6(d)). The official fax telephone numbers for the Group are (703) 308-4242 and (703) 305-3014. NOTE: If Applicant *does* submit a paper by fax, the original signed copy should be retained by applicant or applicant's representative. NO DUPLICATE COPIES SHOULD BE SUBMITTED so as to avoid the processing of duplicate papers in the Office.

Application/Control Number: 09/616,223

Art Unit: 1635

Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Jane Zara whose telephone number is (703) 306-5820. If attempts to

reach the examiner by telephone are unsuccessful, the examiner's supervisor, John LeGuyader,

can be reached on (703) 308-0447. Any inquiry regarding this application should be directed to

the patent analyst, Katrina Turner, whose telephone number is (703) 305-3413. Any inquiry of a

general nature or relating to the status of this application should be directed to the Group

receptionist whose telephone number is (703) 308-0196.
